Introduction to Europeana APIs

The Europeana REST API allows you to build applications that use the wealth of our collections drawn from the major museums and galleries across Europe.

[SEE MORE](#)

Search API

The Search API provides a way to search for metadata records and media on the Europeana repository, for instance *give me all results for the word "Vermeer"*.

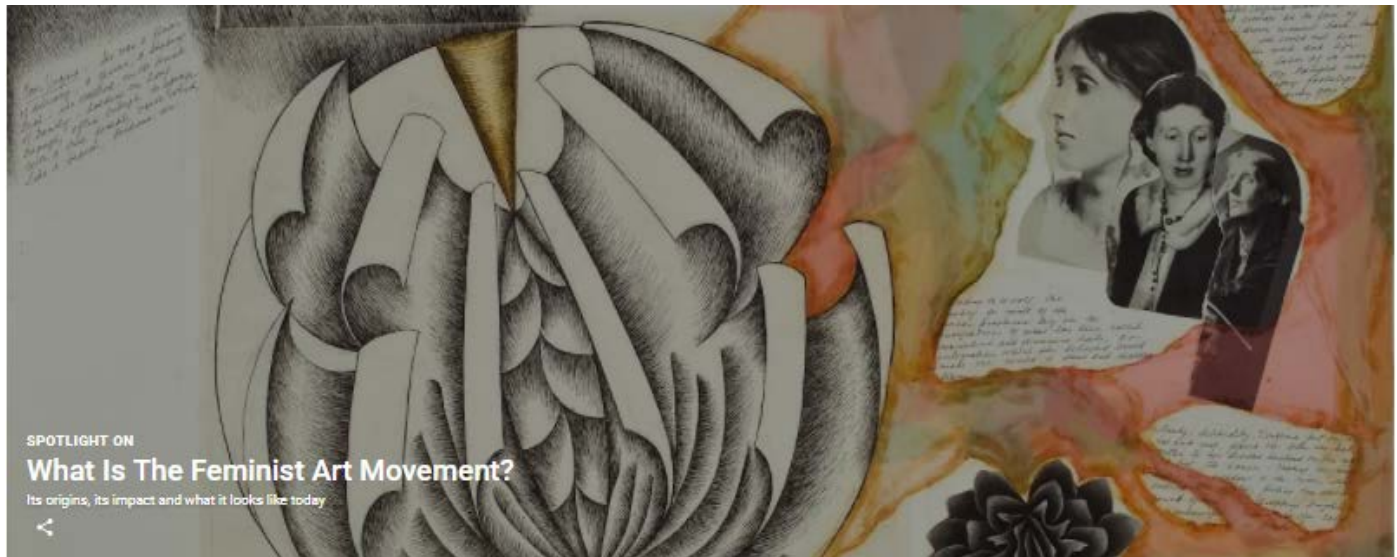

[SEE MORE](#)

Record API

The Record API provides direct access to the Europeana data, which is modeled using EDM.
