ABSTRACT. All metrics published in the *Journal Citation Reports™* are dependent on the complete and correct aggregation of citations to each journal title. Here, we explain how unique cited titles are created for Thomson Reuters indexing, and how variations and ambiguities in titles are collected in order to create the Journal Impact Factor numerator.

Abstract
We consider the relationship between the tight-binding Hamiltonian of the two-dimensional honeycomb lattice of carbon atoms with nearest neighbor hopping only and the 2 + 1 dimensional Hamiltonian of quantum electrodynamics, which follows in the continuous limit. We pay particular attention to the symmetries of the free Dirac fermions including spatial inversion, time reversal, charge conjugation and chirality. We illustrate the power of such a mapping by considering

Abstract

Fatty liver is a major problem for dairy producers because it causes reduced milk production and increased culling rates. The disease is caused by a variety of factors, including genetic, nutritional, and management factors. The purpose of this review is to provide a comprehensive overview of the current knowledge on the pathogenesis, diagnosis, and treatment of fatty liver in dairy cows. The review covers the following topics: (1) Pathogenesis of fatty liver, (2) Clinical signs and diagnosis, (3) Prevention and treatment, and (4) Future research. The review concludes that fatty liver is a complex disease that requires a multifaceted approach to its management. Further research is needed to better understand the underlying mechanisms of the disease and to develop effective prevention and treatment strategies.

Highly Cited Research
This resource captures the people behind the most influential publications in 21 broad subject categories based on citation metrics. Learn more about the methodology. List your current affiliation in ResearcherID to ensure your most current information is reflected in Highly Cited Research.

What is ResearcherID?
ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the *Web of Science* and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

What is ResearcherID?

ResearcherID provides a solution to the author ambiguity problem within the scholarly research community. Each member is assigned a unique identifier to enable researchers to manage their publication lists, track their times cited counts and h-index, identify potential collaborators and avoid author misidentification. In addition, your ResearcherID information integrates with the Web of Science and is ORCID compliant, allowing you to claim and showcase your publications from a single one account. Search the registry to find collaborators, review publication lists and explore how research is used around the world!

ORCID

Did you know you can associate your ORCID ID with your ResearcherID account?

☒ I would like to create an ORCID record.

☐ I already have an ORCID record.

☐ No, thank you.

The Open Researcher and Contributor ID (ORCID, Inc.) is a non-profit organization that aims to solve the author/contributor name ambiguity problem in scholarly communication by creating a central registry of unique identifiers. These identifiers can be used within various systems you may interact with in your professional research workflow, including manuscript submission, etc.

By creating an ORCID you will be able to link your ResearcherID account with this centralized registry.

Use this list to display all the publications that you have authored.

Adding Publications to this list
You can add publications by searching Web of Science™, searching Web of Science™ Core Collection, using EndNote™, or uploading a file. To add publications, click the **Add** link located in the menu on the left-hand side of your screen, or by clicking on the **Add Publications** above.
* Note: Access to Web of Science and Web of Science Core Collection are based on the entitlements of the computer where you are accessing ResearcherID.

Please remember to only add publications that you have authored to this list. This list will be used by Web of Science Core Collection to create a Distinct Author Set, which is a set of papers that will be associated with your name, and your ResearcherID number will be displayed on the Web of Science Core Collection record. This allows Web of Science Core Collection users who find one of your papers on this list to find all of the other papers on this list.

Новая серия: Практические рекомендации по публикации в международных журналах

Как избежать публикации в недобросовестном журнале

Понятие хищнического (мусорного) журнала и его основные признаки. Как проверить, индексируется ли журнал в Web of Science и есть ли у него импакт-фактор? Как оценить и подобрать издание для публикации? Примеры хищнических рассылок: как проверить, куда вам предложили прислать статью.

Основные требования к публикациям в международных журналах – ч. 1-2

Процесс подачи статьи в международный журнал. Технические и содержательные аспекты, на которые следует обратить внимание. Основные причины отказов в публикации. Вспомогательные ресурсы для авторов.

- Нужно ли писать сопроводительное письмо?
- Чего ожидает от вас редактор журнала?
- Какого объема должен быть абстракт статьи?
- Стоит ли посылать статью сразу в несколько журналов?
- Нужно ли вносить все правки, на которых настаивают рецензенты?

Структура научной статьи. Практические советы по написанию основных разделов.

- Как писать на академическом английском языке?
- На какие разделы рецензенты обращают внимание в первую очередь?
- Как написать хороший заголовок?
- Нужны ли на самом деле ключевые слова?
- Сколько источников должно быть в списке литературы?

Що робити?

- Зареєструватися на платформі (створити власний кабінет)
- якщо доступу немає – повідомити
- Провести пошук літератури за своєю темою
- Обрати публікації та створити картотеку статей
- Почати використовувати EndNote
- Зареєструвати та заповнити ResearcherID та ORCID
- Пошукати гранти
