

Открытый доступ: что нового?

Ирина Кучма,

Менеджер программы Открытый доступ, eIFL.net

Презентация на семинаре ОТКРЫТЫЕ РЕПОЗИТАРИИ: УЛУЧШАЯ НАУЧНУЮ КОММУНИКАЦИЮ, 18-21 июня 2008, Национальный университет «Киево-Могилянская Академия»

eIFL.net

- eIFL.net объединяет 2,220 библиотек в 48 развивающихся странах и странах с переходной экономикой с суммарным населением 800 миллионов:
- Армения, Азербайджан, Беларусь, Босния и Герцеговина, Ботсвана, Болгария, Грузия, Гана, Египет, Замбия, Зимбабве, Иордания, Камбоджа, Камерун, Кения, Косово, Китай, Кыргызстан, Лаос, Латвия, Лесото, Литва, Македония, Малави, Мали, Молдова, Монголия, Мозамбик, Непал, Нигерия, Палестина, Польша, Россия, Сенегал, Сербия, Словения, Судан, Свазиленд, Сирия, Таджикистан, Украина, Хорватия, Эстония, Эфиопия, ЮАР.

- Программы eIFL.net:
 - eIFL Переговоры – доступ к коммерческим журналам и базам данных
 - Развитие успешных библиотечных консорциумов
 - eIFL IP – Интеллектуальная собственность и доступ к знаниям
 - eIFL FOSS – свободное и открытое программное обеспечение
 - eIFL OA – Открытый доступ

eIFL OA

- Помощь в создании репозитариев открытого доступа и журналов открытого доступа
- Развитие политик и практик открытого доступа
- Тренинги и консультации для библиотекарей, научных сотрудников, педагогов и студентов

Зачем?

- Шок от стоимости подписки научных журналов.
- The Cornell Libraries Exhibit
- Sticker Shock 2 (2007) updates the original 2001 Sticker Shock display.
- Tyler Corson-Rikert produced this exhibit under the guidance of Jill Powell and John Saylor.
- This work is licensed under a Creative Commons Attribution 3.0 United States License.
- courtesy of Resonance Research Corporation

Зачем?

- Стоимость журналов Materials Science and Engineering A, B, C, & R - \$17,986 - можно купить новую Honda Civic Coupe
 - С 2002-го года цены возросли на 60%!
- <http://automobiles.honda.com/>

Зачем?

- Журнал The Computer Methods in Applied Mechanics and Engineering стоит \$9,069.
- Можно оборудовать домик на двоих солнечной батареей для нагрева воды
- З 2002-го года цены возросли на 34%

Picture: Solahart / ESTIF

Зачем?

- The International Journal of Solids and Structures стоит \$7,833.
- За эти деньги можно слетать на Мачу Пикчу в Южной Америке
- С 2002-го года цены возросли на 34%

INTRAV

Зачем?

- Стоимость the Journal of Membrane Science - \$7506
- Можно купить новый Yamaha VX Sport Jet Ski
- С 2002-го года цены возросли на 23%

<http://www.yamaha-motor.com>

Что?

- Под открытым доступом к литературе [в первую очередь отрецензированным журнальным статьям] мы имеем ввиду бесплатный доступ через публичный интернет, позволяющий читателям читать, загружать, копировать, распространять и печатать, искать и делать ссылки, индексировать, передавать как данные, или использовать с другой легальной целью, минуя финансовые и технические барьеры, лишь сохраняя целостность работы и ссылаясь на автора.
- Будапештская инициатива «Открытый Доступ»

Как?

Соединение **старой традиции** и **новой технологии** может принести беспрецедентно большую общественную пользу.

Старой традицией является готовность ученых и исследователей **безвозмездно публиковать** плоды своих трудов в научных изданиях **для получения и распространения новых знаний.**

Новой технологией становится **Интернет.**

Обретение доступа к научной литературе **ускорит исследования, расширит объемы обучения,** приведет к **обмену знаниями,** поможет **наиболее эффективно использовать** эту литературу

- Будапештская инициатива «Открытый Доступ»

Почему?

Открытый доступ является **экономически выгодным**

Дает **невероятно широкие возможности** для **поиска и использования** необходимой литературы

Работы авторов получают **огромную новую аудиторию** и их **роль и масштаб значительно возрастают.**

Будапештская Инициатива «Открытый Доступ»

Почему?

Открытый доступ помогает избежать дублирования исследований **экономит время и деньги**

Каждый исследователь имеет доступ к **полной картине**, а не фрагменту

Помогает создавать **базы данных** и **базы знаний**

Обеспечивает возврат инвестиций в науку

Миссия выполнима

Johannes (Jan) JM Velterop: Open Access Publishing And Scholarly Societies.

Publication Fees for PLoS Journals

To provide open access, PLoS journals use a business model in which our expenses — including those of peer review, of journal production, and of online hosting and archiving — are recovered in part by charging a publication fee to the authors or research sponsors for each article they publish. Authors who are affiliated with one of our [Institutional Members](#) are eligible for a discount on this fee.

We offer a complete or partial fee waiver for authors who do not have funds to cover publication fees. Editors and reviewers have no access to author payment information, and hence inability to pay will not influence the decision to publish a paper.

- PLoS Biology US\$2750
- PLoS Medicine US\$2750
- PLoS Computational Biology US\$2100
- PLoS Genetics US\$2100
- PLoS Pathogens US\$2100
- PLoS ONE US\$1250
- PLoS Neglected Tropical Diseases US\$2100

Read our [Publication Fee FAQs](#).

PLOS JOURNALS

[PLOS Journals](#)[Publication Fees](#)[Open Access License](#)[Media Inquiries](#)[PLOS in Print](#)[Creative Uses](#)

Thank you and your staff so much for making the publication process very simple. I feel that PLoS Pathogens fills a critically important niche that is not served by other high-profile journals, and I look forward to reading the outstanding work of my colleagues (and hopefully more from my lab) in your journal."

ABOUT BIOLINE ALL JOURNALS REPORTS NEWS FAQ

Bioline International is a not-for-profit electronic publishing service committed to providing open access to quality research journals published in developing countries. BI's goal of reducing the South to North knowledge gap is crucial to a global understanding of health (tropical medicine, infectious diseases, epidemiology, emerging new diseases), biodiversity, the environment, conservation and international development. With peer-reviewed journals from Brazil, Cuba, India, Indonesia, Kenya, South Africa, Uganda, Zimbabwe and more to come, BI provides a unique service by making bioscience information generated in these countries available to the international research community world-wide.

Find out more about the:

- ☐ Mandate and Organization of Bioline International
- ☐ Journals in the Bioline International system
- ☐ Bioline Partners
- ☐ Apply to join Bioline International
- ☐ Features and Added Services
- ☐ What's new at Bioline International
- ☐ Linking & Harvesting Bioline data

Bioline International is managed by scientists and librarians. It is a collaborative initiative of the University of Toronto Libraries, Canada (management office), the Reference Center on Environmental Information, Brazil (host computer and software development) and Bioline/UK (liaison).

To Contact us, please email: Bioline.International@utoronto.ca

We look forward to your comments about the journals in Bioline International and of our services.

New from BioMed Central

New Impact Factors for BioMed Central journals

The 2007 edition of the Thomson Reuters' Journal Citation Report, due to be released this week, will include the first official Impact Factors for 12 BioMed Central journals. Unofficial Impact Factors have also been calculated for more than 100 BioMed Central journals, and this information is now listed on our [Impact Factor FAQ page](#).

EAHIL in Helsinki, Finland 23 - 28 June 2008

Featured articles [Open Access](#)

Understanding cytokinetics with computational metabolomics

Molecular Cancer 2008, **7**:57

The fully automated computational metabolomics method CoMet examined metabolite levels in cancer cells and provides evidence that intracellular concentrations of antiproliferative metabolites may be decreased in these cells.

Knee salvage surgery successful

Arthritis Research & Therapy 2008, **10**:R68

Young patients who undergo autologous transfer of the posterior femoral condyle to treat lesions of the knee show significant improvements in daily life activity levels, with many returning to recreational sports.

Neo-sex chromosomes

Genome Biology 2008, **9**:R98

The nascent neo-sex chromosomes of black muntjacs show that regulatory mutations could accelerate the degeneration of the Y chromosome and contribute to the further evolution of dosage compensation.

A pomegranate a day...

Journal of Inflammation 2008, **5**:9

Oral pomegranate juice extracts are both bioavailable and bioactive, inhibit cyclo-oxygenase enzymes and may have anti-inflammatory properties through mediation of cytokine-induced prostaglandin and nitric oxide production.

Costly toothpaste hampers dental health

The Directory of Open Access Repositories - OpenDOAR

[Search for repositories](#) | [Search repository contents](#) | [List of repositories](#) | [Repository Statistics](#)

OpenDOAR is an authoritative directory of academic open access repositories. Each OpenDOAR repository has been visited by project staff to check the information that is recorded here. This in-depth approach does not rely on automated analysis and gives a quality-controlled list of repositories.

As well as providing a simple [repository list](#), OpenDOAR lets you [search for repositories](#) or [search repository contents](#). Additionally, we provide tools and support to both repository administrators and service providers in sharing best practice and improving the quality of the repository infrastructure. Further explanation of these features is given in a project document [Beyond the list](#).

The current directory lists repositories and allows breakdown and selection by a variety of criteria - see the [Find](#) page - which can also be viewed as [statistical charts](#). The underlying database has been designed from the ground up to include in-depth information on each repository that can be used for search, analysis, or underpinning services like text-mining. The OpenDOAR service is being developed incrementally, developing the current service as new features are introduced. A list of [Upgrades and Additions](#) is available.

Developments will be of use both to users wishing to find original research papers and for service providers like search engines or alert services which need easy-to-use tools for developing tailored search services to suit specific user communities.

**OpenDOAR has
over 1100 listings!**

Growth of the OpenDOAR Database

Repositories by Continent

The importance and widespread support for the project can be seen in its funders, led by the [Open Society Institute](#) (OSI), along with the [Joint Information Systems Committee](#) (JISC), the [Consortium of Research Libraries](#) (CURL) and [SPARCEurope](#).

OpenDOAR has also been identified as a key resource for the Open Access community ([K.B.Oliver & R.Swain, 2006](#) - PDF), and was one of the services which contributed to SHERPA being awarded the [SPARC Europe Award for Outstanding Achievements in Scholarly Communications](#).

More information on the project is available on this site through the [About](#) page.

Policies Tool

Introduction

In a survey for OpenDOAR in early 2006, Peter Millington discovered that about two thirds of Open Access repositories did not have publicly stated policies for the permitted re-use of deposited items or for such things as submission of items, long term preservation, etc. This complicates matters for organisations wishing to provide search services, which in turn reduces the visibility and impact of these repositories.

Reference

Peter Millington (2006) [Moving Forward with the OpenDOAR Directory](#), 8th International Conference on Current Research Information Systems, Bergen, 11th-13th May 2006

Purpose of this Tool

To improve the situation, OpenDOAR has created this simple tool to help repository administrators to formulate and/or present their repository's policies. It provides a series of check boxes and pick lists for all the key policy options, which can be very quickly selected.

We have even provided recommended options for minimum compliance with the aims of the Open Access movement, and for optimising usage of your repository. For example, the minimum policy recommends allowing re-use of metadata for not-for-profit purposes, but prohibits commercial re-use. On the other hand, the optimum policy also allows free commercial re-use because the extra exposure this gives to your material probably outweighs any disadvantages.

POLICIES

Metadata Policy for information describing items in the repository

1. Anyone may access the metadata free of charge.
2. The metadata may be re-used in any medium without prior permission for not-for-profit purposes and re-sold commercially provided the OAI Identifier or a link to the original metadata record are given.

[Edit](#)

Data Policy for full-text and other full data items

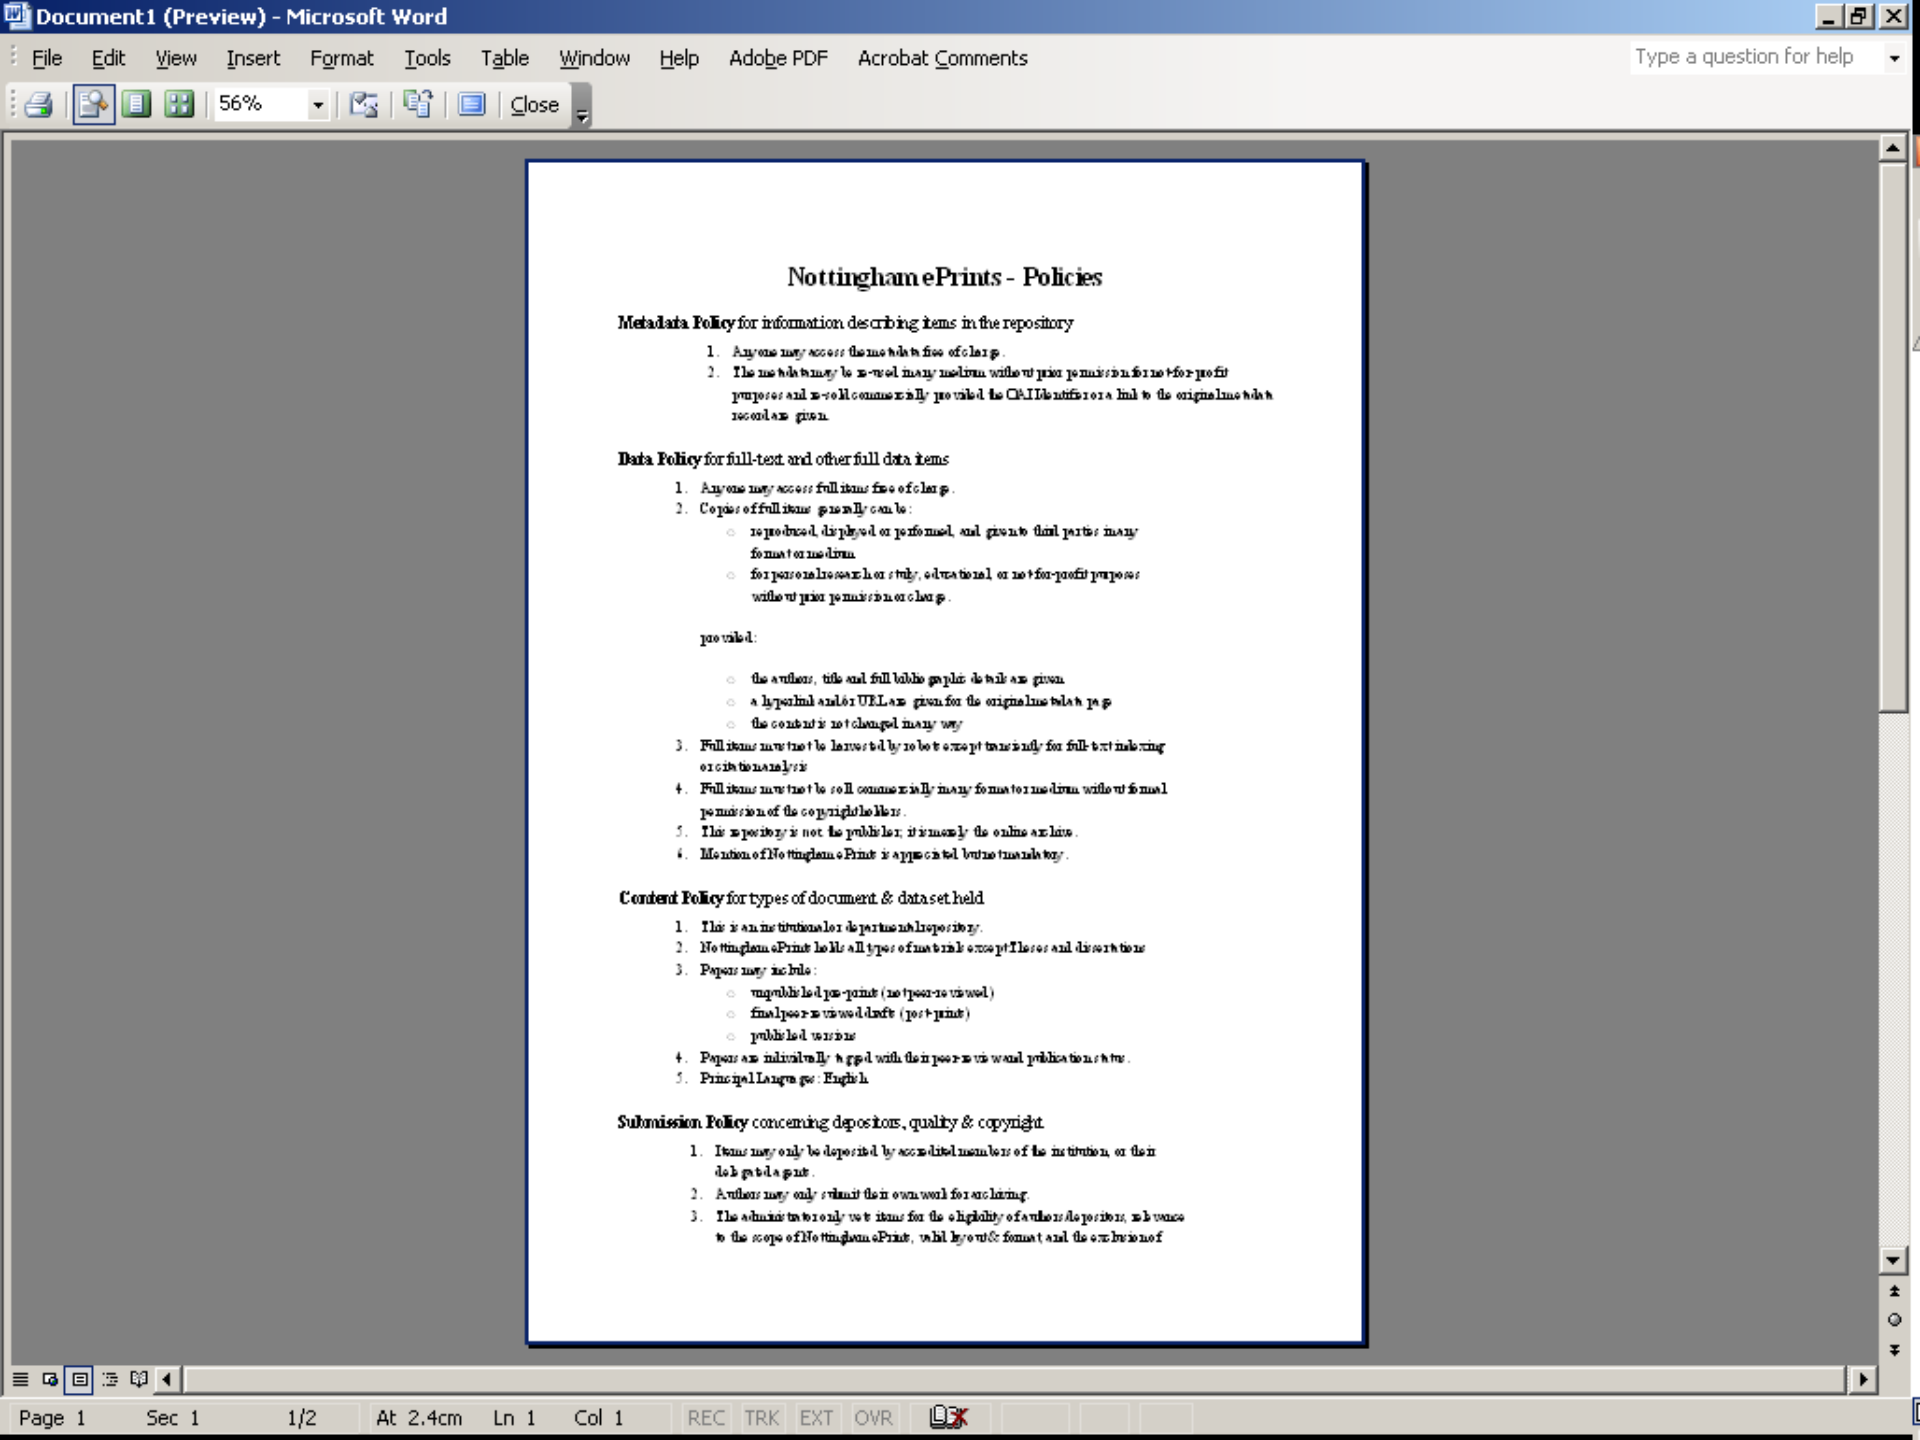

1. Anyone may access full items free of charge.
2. Copies of full items generally can be:
 - o reproduced, displayed or performed, and given to third parties in any format or medium
 - o for personal research or study, educational, or not-for-profit purposes without prior permission or charge.provided:
 - o the authors, title and full bibliographic details are given
 - o a hyperlink and/or URL are given for the original metadata page
 - o the content is not changed in any way
3. Full items must not be harvested by robots except transiently for full-text indexing or citation analysis
4. Full items must not be sold commercially in any format or medium without formal permission of the copyright holders.
5. This repository is **not** the publisher; it is merely the online archive.
6. Mention of the repository is appreciated but not mandatory.

[Edit](#)

Content Policy for types of document & data set held

1. This is an institutional or departmental repository.
2. The repository holds all types of materials except: Theses and dissertations
3. Papers may include:
 - o unpublished pre-prints (not peer-reviewed)
 - o final peer-reviewed drafts (post-prints)
 - o published versions
4. Papers are individually tagged with their peer-review and publication status.
5. Principal language(s): English

Nottingham ePrints - Policies

Metadata Policy for information describing items in the repository

1. Anyone may access the metadata free of charge.
2. The metadata may be re-used in any medium without prior permission for not-for-profit purposes and may be commercially provided to the CRI. It identifies a link to the original item where available.

Data Policy for full-text and other full data items

1. Anyone may access full items free of charge.
2. Copies of full items generally can be:
 - o reproduced, displayed or performed, and given to third parties in many formats or media
 - o for personal research or study, educational or not-for-profit purposes without prior permission or charge.
- provided:
 - o the authors, title and full bibliographic details are given
 - o a hyperlink and/or URL are given for the original item where possible
 - o the content is not changed in any way
3. Full items may not be altered by re-bits except transiently for full-text making or citation analysis
4. Full items may not be re-used commercially in any format or medium without formal permission of the copyright holders.
5. This repository is not the publisher, it is merely the online archive.
6. Mention of Nottingham ePrints is appreciated but not mandatory.

Content Policy for types of document & dataset held

1. This is an institutional departmental repository.
2. Nottingham ePrints holds all types of material except theses and dissertations
3. Papers may include:
 - o unpublished pre-print (not peer-reviewed)
 - o final peer-reviewed draft (post-print)
 - o published versions
4. Papers are individually tagged with their peer-reviewed publication status.
5. Principal Language: English

Submission Policy concerning depositions, quality & copyright

1. Items may only be deposited by accredited members of the institution or their designated part.
2. Authors may only submit their own work for archiving.
3. The administrator only vets items for the eligibility of authors' positions, relevance to the scope of Nottingham ePrints, valid copyright format and the contribution of the authors.

European University Association

Recommendations for University Leadership

- Universities should develop institutional policies and strategies that foster the availability of their quality-controlled research results for the broadest possible range of users, maximising their visibility, accessibility and scientific impact.
- The basic approach ...should be the creation of an institutional repository or participation in a shared repository..
- University institutional policies should require that their researchers deposit (self-archive) their scientific publications in their institutional repository upon acceptance for publication. Permissible embargoes should apply only to the date of open access provision and not the date of deposit.
- ...It should be the responsibility of the university to inform their faculty researchers about IPR and copyright management...
- University institutional policies should explore also how resources could be found and made available to researchers for author fees to support the emerging "author pays model" of open access.

This page lists some of the most important activities of the Max Planck Society in the area of information provision and information management, which are being operated under the umbrella of the MPDL.

▶ Information Resources

▶ Electronic Journals Library by subject

▶ eDoc Server

Institutional repository of the Max Planck Society to provide open access to research results

▶ vLib

Integrated access to information resources for Max Planck Researchers ... ▶ Flyer

▶ MPG/SFX Citation Linking Services

Access SFX services relevant for a particular reference ... ▶ Flyer

▶ Living Reviews

are open access scientific journals following a special editorial concept. They publish review articles, which are regularly being updated by their authors (hence 'living'). A publication platform and various services are provided to support the operation of these journals. The publishing software is - open source- available for further development and reuse (see ▶ <http://dev.livingreviews.org>).

The Open Citation Project - Reference Linking and Citation Analysis for Open Archives

See also [Papers produced by the project](#)

The effect of open access and downloads ('hits') on citation impact: a bibliography of studies

Find your way through the bibliography

[Latest additions](#)[Studies with original data](#)[Web tools for measuring impact](#) | [Comparative reviews](#)[Background](#)[The financial imperative: correlating research access, impact and assessment](#) | [Citation analysis, indexes and impact factors](#) | [Open access](#)

Despite significant growth in the number of research papers available through open access, principally through author self-archiving in institutional archives, [it is estimated that only c. 20% of the number of papers published annually are open access](#). It is up to the authors of papers to change this. Why might open access be of benefit to authors? One universally important factor for all authors is impact, typically measured by the number of times a paper is cited (some older [studies have estimated monetary returns to authors](#) from article publication via the role citations play in determining salaries). **Recent studies have begun to show that open access increases impact**. More studies and more substantial investigations are needed to confirm the effect, although a [simple example](#) demonstrates the effect.

This chronological bibliography is intended to describe progress in reporting these studies; it also lists the Web tools available to measure impact. It is a focused bibliography, on the relationship between impact and access. It does not attempt to cover citation impact, or other related topics such as open access, more generally, although some key papers in these areas are listed as jump-off points for wider study.

Project objectives:

The project's major objective is enriching the toolkit used for the assessment of the impact of scholarly communication items, and hence of scholars, with **metrics that derive from usage data**. The project has created a **semantic model of the scholarly communication process**, and an associated **large-scale semantic store** that relates a range of bibliographic, citation and usage data obtained from a variety of sources. After **mapping the structure of the scholarly community** on the basis of the established reference data set, MESUR will conduct an investigation into the **definition and validation of a range of usage-based metrics**. The defined metrics will be cross-validated, resulting in the formulation of **guidelines and recommendations**.

Funding: The Andrew W. Mellon Foundation

Timeline: October 2006 - October 2008

Principal investigator: Johan Bollen

Institution: Los Alamos National Laboratory

Team: Digital Library Research & Prototyping
Team of the LANL Research Library

People: **Johan Bollen** is the Principal Investigator, **Herbert Van de Sompel** serves as an architectural consultant, and **Aric Hagberg** of the LANL Mathematical Modeling and Analysis group serves as modeling consultants. **Marko A. Rodriguez**, a recent PhD graduate at the University of California Santa Cruz and now LANL post-doc at the LANL Center for Non-Linear Science, has supported the project's research and development. **Ryan Chute** of the LANL Research Library is now the project's main developer and database manager.

What the project is doing

Research Assessment is a complex activity involving decisions made by many parties (individual researchers, research managers, institutional administrators, external assessors) and potentially involving many interoperating software systems. This project aims to develop practical solutions for integrating DSpace and EPrints repositories and repository workflows into RAE activities (both from institutional and national perspectives), and to advise repository managers on how to deploy these

The Top 20 world universities 2006 by G-Factor

G-Factor Top 300 Universities 2006 Top 300 Universities Chart

The following table shows the Top 20 international universities ranked by G-Factor, along with the 2005 rank position produced by Shanghai Jao Tong University (China) in their annual international university ranking.

G-Factor Rank	SJTU Rank	Institution
1	5	Massachusetts Inst Tech (MIT)
2	1	Harvard Univ
3	4	Univ California - Berkeley
4	3	Stanford Univ
5	8	Princeton Univ
6	15	Univ Pennsylvania
7	17	Univ Washington - Seattle
8	25	Univ Illinois - Urbana Champaign
9	54	Carnegie Mellon Univ
10	43	Rutgers State Univ - New Brunswick
11	2	Univ Cambridge
12	21	Univ Michigan - Ann Arbor
13	16	Univ Wisconsin - Madison
14	12	Cornell Univ
15	73	Univ Arizona
16	6	California Inst Tech
17	27	Swiss Fed Inst Tech - Zurich
18	14	Univ California - Los Angeles
19	32	Univ Minnesota - Twin Cities
20	10	Univ Oxford

There are some striking similarities between the G-Factor international university ranking and the SJTU ranking. All but two of the SJTU top 10 are in the G-Factor top 20, the exceptions being Columbia University and the University of Chicago. Many of the rank positions between the two rankings are quite similar. There are some noticeable cases of universities that are ranked much more highly by G-Factor than by SJTU - for example University of Arizona, Carnegie Mellon and Rutgers.

The G-Factor Top 20 seems to show that there is a general correlation between universities that do well in traditional "bricks-based" rankings and those that do well in the "clicks-based" G-Factor ranking. Moreover, there are some universities that are doing much better in the world of "clicks" than measurements of their "bricks" might suggest; and some highly respected universities are not as well represented in the on-line world as their traditional reputations would suggest.

G-Factor Scores for Top 300 Universities**G-Factor Top 20 Universities 2006 Top 300 Universities 2006**

The following chart shows the G-Factor scores and ranking for the top 300 international universities. The G-Factor is the number of links to each university's website from the other 299 universities in the chart, as measured by Google searches performed in January 2006. The data illustrated in this chart thus represent 90,000 separate Google searches.

Toolkit

[comment](#)

[Toolkit](#)

[Culture Change >>](#)

Welcome to the Electronic Theses Online System (ETHOS) toolkit. Using this toolkit will enable your institution to work in partnership with other Higher Education Institutions (HEI) and the British Library to ensure a high level of national and international visibility for UK postgraduate theses and dissertations.

ETHOS aims to enable end-users to access the full text of electronically stored UK theses, in secure format, via a single Web interface. The toolkit shows how theses produced by students at your institution can be accessed, via ETHOS, from the British Library or from your institutional (or consortium) repository.

The main sections of the toolkit are as follows:

- [Culture Change](#): This section explains the importance of making theses available in electronic format, and identifies the issues that need to be highlighted to achieve acceptance of the concept.
 - [What are e-theses?](#)
 - [What is 'ETHOS'?](#)
 - [Who benefits from e-theses?](#)
 - [Acquiring content](#)
 - [What impact do e-theses have?](#)
 - [Further information](#)
- [Business Requirements](#): This section considers business models and options; the business case for establishing an institutional repository; central hub requirements; legal and administrative issues; and resource implications

Репозитории тезисов и диссертаций

- John Hagen, West Virginia University - о репозитории тезисов и диссертаций:
- Переход на электронные коллекции – использование возросло на 145%
- Самые популярные тезисы и диссертации – «загружались» 37,501 раз (история) и 33,752 раз (инженерное дело); историческая диссертация при этом хорошо продавалась
- У 69% студентов курса creative writing были более успешные карьеры в издательском мире – эти студенты размещали свои работы в открытом доступе как маркетинговый инструмент

Что делать?

- Не делать ничего, и дальше издавать печатные журналы тиражом 200 экземпляров
- Трансформировать журнал в журнал открытого доступа
- Разработать гибридную модель и предлагать автором выбор – открытый или платный доступ

Что делать?

- Создавать репозитории открытого доступа
- Более 100 репозитариев в странах eIFL – демонстратор (<http://eifl.cq2.org>)

A Survey and Evaluation of Open-Source Electronic Publishing Systems

This Wikispace is devoted to comment and discussion, first, of the 2006-2007 study performed by The Johns Hopkins University and commissioned by the Open Society Institute (OSI) providing a survey and evaluation of open-source electronic publishing systems. It is, secondly, devoted to a continuing discussion of open-source electronic publishing systems in general.

The white paper that resulted from the original study is posted here: [Open Source ePublishing Systems White Paper.pdf](#).

The Powerpoint slides from Mark Czyk's Fall 2007 CNI presentation are posted here: [cniFall2007.ppt](#).

A summary table of data, comparing the systems side-by-side, is posted here: [index2.html](#).

A page with clickable displays of all the data gathered for each of the systems is posted here: [index.html](#). This requires a browser with a validating XML parser (e.g. Internet Explorer) in order to function.

Страны eIFL

- Грузия – 8 журналов открытого доступа, полнотекстовый репозиторий диссертаций в Национальной парламентской библиотеке (<http://www.nplg.gov.ge/>), рабочая группа по развитию открытого доступа

Страны eIFL

- Кыргызстан – репозитарий Американского университета Центральной Азии, корпоративный репозитарий диссертаций (<http://oel.bik.org.kg/>), проект регионального репозитария Центральной Азии
- Инициатор и менеджер проектов - Ассоциация «Библиотечно-информационный консорциум» Кыргызстана (БИК) (<http://www.bik.org.kg>)

Страны eIFL

- Литва – 2004 – национальная программа при поддержке правительства - репозиторий диссертаций – пилотный проект для Балтийских стран при поддержке UNESCO – Каунасский Технический Университет и Литовская сеть академических библиотек (LABT) <http://etd.elaba.lt/>, сотрудничают с Networked Digital Library of Theses and Dissertations (NDLTD).
 - 6 150 диссертаций - 2 386 (38%) в Открытом доступе
 - планы на 2008 год - 7 600 dissertations и 50% в открытом доступе
- 7 журналов открытого доступа

Страны eIFL

- Польша – 49 журналов открытого доступа, 26 цифровых библиотек

Страны eIFL

- Россия:
- 1,845 диссертаций в Открытой Российской Электронной Библиотеке (<http://orel.rsl.ru/r1.html>)
- 15 журналов открытого доступа
- 19 репозитариев открытого доступа

Россия

- e-Science:
 1. развитие информационных систем и сервисов непосредственно в исследовательских и образовательных организациях (CRIS);
 2. развитие онлайн-научной инфраструктуры (research e-infrastructure) в национальных и международных масштабах, примером которой является система Соционет (<http://socionet.ru/>);
 3. организационная модернизация Науки на основе достижений по пп. 1 и 2 и формирование, так называемой, e-Science.

Наиболее важными в настоящее время элементами формирования e-Science является повсеместная и полная реализация открытого доступа к результатам исследований (выполненных на средства "общественных" фондов)

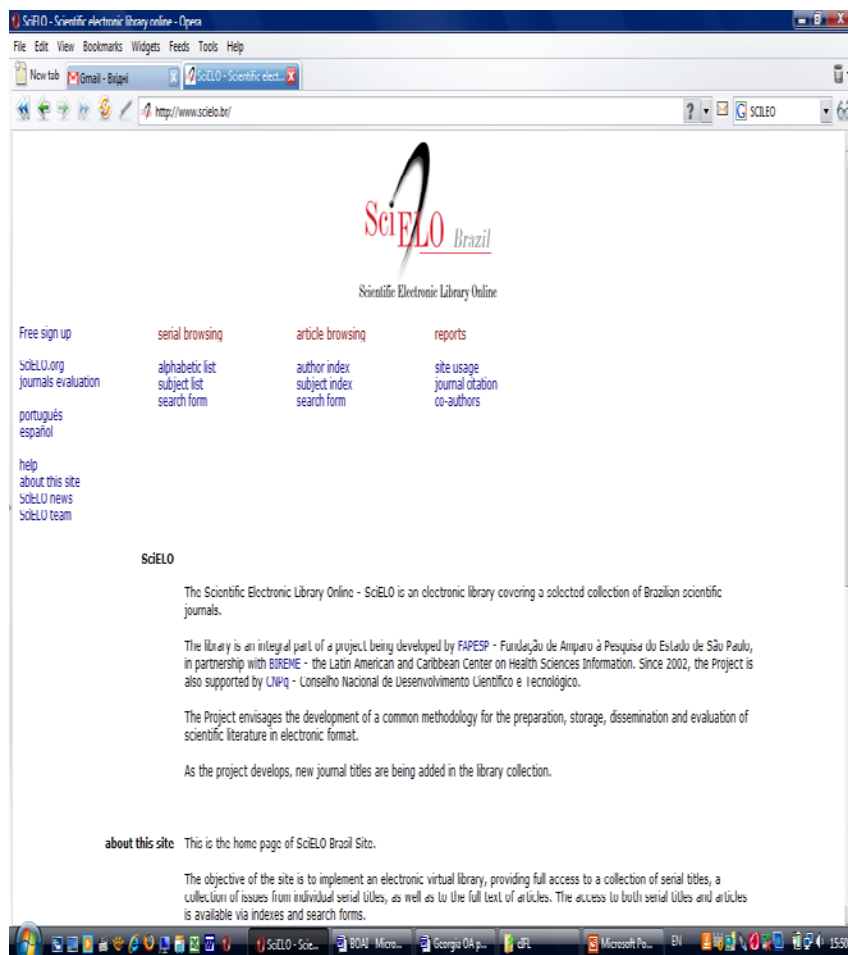

Страны eIFL

- Сербия – репозитарий журналов открытого доступа Национальной библиотеки Сербии (<http://www.doiserbia.nbs.bg.ac.yu>), 13 журналов открытого доступа
- Словения – 16 журналов открытого доступа, 2 репозитария

Страны eIFL.net

- Украина – с января 2007 Закон Украины «О принципах развития информационного общества на 2007-2015 гг.» – обязательное обеспечение открытого доступа к исследованиям, производим за счет Госбюджета - 😊
- Пока не исполняется 😞
- 10 журналов открытого доступа – издатели активизировали свою международную деятельность – участие в общих исследовательских проектах
- Портал для журналов открытого доступа в Национальной научной библиотеке совместно с Институтом программных систем НАНУ
- 7 репозитариев открытого доступа

Сотрудничество

- Отпраздновали 10 лет
- 8 стран (Аргентина, Бразилия, Венесуэла, Испания, Колумбия, Куба, Португалия, Чили)
- Более 7,5 млн. даунлодов только Бразильской коллекции
- Государственное финансирование

Hrcak

- Hrcak, <http://hrcak.srce.hr>
- 70% научных и технических журналов, издаваемых в Хорватии, в открытом доступе
- Государственное финансирование
- Репозитории открытого доступа на факультетах Загребского университета

Open Access Journal Collection (Beta)

Click here and give us »
your feedback!

Welcome to the beta version of Sabinet's Full Open Access Journal Collection.

The collection currently comprises 44 South African journals, which may be searched individually, and provides immediate access to the PDF versions of 6 000+ full-text articles. Of the journals in the collection, 14 appear on the Approved South African Journals list, the ISI list, or the IBSS list. New journal titles and issues are added to the collection on an ongoing basis.

Some journals also contain metadata records (including abstracts) for older articles where full text is not available.

Publishers who would like to make their journals available as Open Access journals, are welcome to [contact us](#). We would also value any [feedback on the Sabinet Full Open Access Journal Collection](#).

- ACCORD : Occasional Papers
- Africa Dialogue Monograph Series (Discontinued)
- African Journal of Farm Child and Youth Development (Discontinued)
- African Markets Overview (Discontinued)
- Agriprobe
- Article 19
- Article 40
- Bulletin of Statistics
- Conspectus
- Crime Research in South Africa
- Current Allergy & Clinical Immunology (*)
- Dairy Mail Africa

- M & J Retail
- Meditari (*)
- Money Newsletter (Discontinued)
- NAFU Farmer
- News and Views for Magistrates
- Potchefstroom Electronic Law Journal (#)
- Professional Nursing Today
- SA Horseman
- SA Pharmaceutical Journal
- SA Pharmacist's Assistant
- Scientia Militaria (*)
- South Africa Rural Development Quarterly (Discontinued)
- South African Family Practice (*)

Other available subscription publications:

Full Service

Currently there are [264 online journals available](#) through the full [SA ePublications subscription service](#).

Journal Collections

Now you can subscribe to subsets of the full SA ePublications service.

Journals are bundled together into the following areas of interest:

- Business & Finance
- Law
- Medical & Health
- Religion
- Science, Technology & Agriculture
- Social Sciences & Humanities

ЮАР

- Решение Академии наук о выделении грантов для публикаций статей в журналов открытого доступа
- 13 репозитариев открытого доступа
- Рабочая группа по развитию открытого доступа

Спасибо!
