Conclusions

- Ukrainian political leaders only partly represent citizens in the domain of foreign policy;
- There is quite stable consensus amongst the elites about Ukrainian state and economic sovereignty, but not amongst their electorate;
- There are sharp disagreements about geopolitical vectors
- Yanukovych, Yuschenko and Tymoshenko use three different types of communicative strategies:
- Hidden orientation towards his electorate, vague statements about problematic issues (Yanukovych)
- Hard orientation towards her electorate, while emphasizing disagreement with opponents (Tymoshenko);
- Soft orientation towards his electorate, while emphasizing several strategic values including language and western geopolitical orientation (Yuschenko).

Foreign policy remains factor of instability in Ukraine.
